Vizag, Andhra Pradesh – 530027, India

Professional Summary

Highly motivated Computer Science undergraduate with a strong foundation in software development, data structures, and algorithms. Experienced in building AI-driven and full-stack applications using Python, Java, HTML, CSS, and JavaScript, with hands-on exposure to machine learning and deep learning projects through internships. Skilled in integrating AI models with real-world software systems and improving application performance. Passionate about solving practical problems and developing scalable, intelligent software solutions.

Education

B.Tech in Computer Science and Engineering - RGUKT IIIT, Ongole	2023 - 2027
CGPA: 9.3/10	
Pre-University Education - RGUKT IIIT, Ongole	2021 - 2023
Grade: 9.8/10	
Secondary Education - Sri Chaitanya Techno School	2020 - 2021
GPA: 10/10	

Projects

EVEN'Z <i>Web-Based Event Management System</i>	Jul 2025 – Nov 2025
- Developed a full-stack Event Management System using HTML, CSS, JavaScript, Node.js, and Express.js, implementing a three-tier architecture for automated event creation, registration, booking, and administration. - Built secure RESTful APIs integrated with Oracle Database, featuring optimized SQL queries, connection pooling, bcrypt-based authentication, session management, role-based access control, and OTP-based password reset. - Applied Agile SDLC practices and conducted Black Box and White Box testing to ensure system scalability, security, and reliable end-to-end performance. - Implemented session-based authentication and authorization using Express sessions, ensuring secure user persistence, protected routes, and role-specific access across the application.	
Virtual Voice Assistant <i>AI Web-based Automation Assistant</i>	Jan 2025 – Apr 2025
- Built a Python-based intelligent voice assistant integrating speech-to-text (STT), text-to-speech (TTS), and NLP pipelines to process voice commands, chatbot queries, and automate web/application tasks in real time. - Implemented computer vision-driven facial recognition using deep learning models to enable secure authentication, user identification, and personalized assistant behavior. - Architected a modular backend system for real-time command handling, integrating voice processing, NLP inference, and automation services to improve scalability, responsiveness, and system reliability. - Integrated API-based services and system-level automation to execute real-time commands, manage external application interactions, and ensure efficient backend task orchestration.	

Internships

AI / ML Intern - Infosys Springboard

Oct 2025 – Dec 2025

- Completed the project **AI-Driven Archaeological Site Mapping** as part of the Infosys Springboard internship program.
- Developed an AI-based geospatial analysis pipeline using satellite and drone imagery for ruin segmentation, artifact detection, and vegetation analysis.
- Implemented deep learning models including U-Net / DeepLabV3+ for semantic segmentation and YOLOv5 / Faster R-CNN for artifact detection and classification.
- Built a terrain erosion prediction model using XGBoost / Random Forest and integrated results into an interactive geospatial dashboard using Streamlit/Dash and GeoPandas.

Deep Learning Intern - UptoSkills

Nov 2025 – Jan 2026

- Completed the **Real-Time Chain-Snatching Detection System** as part of a project-based internship at UptoSkills, developing a real-time surveillance analysis solution.
- Designed and implemented a real-time computer vision pipeline using YOLO for object detection and ByteTrack for multi-object tracking to monitor human interactions in CCTV video streams.
- Integrated CNN-based deep learning models with the Social Force Method to analyze pedestrian motion patterns and detect anomalous behaviors associated with chain-snatching incidents.
- Optimized end-to-end inference for real-time performance, enabling accurate detection, tracking, and event classification from live and recorded surveillance feeds.

Certifications

- Python for Data Science – NPTEL (Silver Certification)
- Artificial Intelligence Certifications – Infosys Springboard
- Data Analysis using Python – IBM
- Cybersecurity Based Course – Rinex
- Cloud Computing - NPTEL (IIT KHARAGPUR)
- Artificial Intelligence: Search methods and problem Solving - NPTEL

Achievements & Extracurricular Activities

- Technical Coordinator at ORNATE 2025 Tech Fest – RGUKT Ongole
- Volunteer of Helping Hands Organization in campus
- Volunteer of National Service Scheme

Technical Skills

- **Programming:** Python, Java, C, C++
- **AI/ML:** OpenCV, scikit-learn, NLP, TTS, Face Recognition
- **Web Tools:** Streamlit, Tkinter, HTML, CSS, JavaScript
- **Data Tools:** Pandas, NumPy, Pickle, CSV handling
- **Cloud & Security:** IBM Cloud, Cybersecurity fundamentals

Soft Skills

Problem Solving | Team Collaboration | Communication | Creativity | Adaptability | Time Management

Languages Known

Telugu – Fluent | English – Proficient | Hindi – Conversational
