PROFILE SUMMARY

Final-year CSE student (RGUKT IIIT Ongole, 9.2 CGPA) with 3 AI/ML internships and hands-on experience in computer vision and applied deep learning. Built and deployed 3 Streamlit-based AI systems, including a Random Forest classifier reaching 92% test accuracy. Seeking SDE / AI-ML Engineer roles.

EXPERIENCE

Infosys Springboard

Oct 2025 – Dec 2025

AI/ML Intern

Remote

- Built an archaeological site-boundary segmentation pipeline using YOLO on 500+ manually collected and annotated images, validating results for accuracy and deploying the final model as a live Streamlit application.

UptoSkills

Nov 2025 – Jan 2026

Deep Learning Intern (Co-Team Lead)

Remote

- Rebuilt a live CCTV multi-object tracking pipeline after an initial low-accuracy attempt by expanding and re-annotating the dataset and researching advanced architectures (YOLO, ByteTrack, Social Force Method, CNN-based behavior classification); as co-team lead, defined the technical roadmap and task plan for fellow interns.

APSSDC

May 2026 – Jul 2026

Machine Learning Intern

Remote

- Learned Python and ML from the ground up, then built a Smart Irrigation System predicting optimal water levels from agricultural field data using trained ML models, deployed as a live Streamlit application for end users.

ACADEMIC PROJECTS

Citrus Disease Detection | *OpenCV, Random Forest, Streamlit, HSV, GLCM, LBP*

Feb 2026 – Apr 2026

- Achieved 92% test accuracy on 2,000+ citrus leaf images by engineering a custom HSV/GLCM/LBP feature pipeline and training a Random Forest classifier, deployed as a real-time Streamlit application.

EVEN'Z – Event Management System | *HTML, CSS, JavaScript, Node.js, Oracle DB*

Jul 2025 – Nov 2025

- Developed a full-stack event management platform with separate admin and user portals, implementing REST APIs, OTP-based authentication, and role-based access control on Oracle DB, containerized with Docker for simplified setup.

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript, SQL

AI / ML & Deep Learning: TensorFlow, PyTorch, OpenCV, scikit-learn, CNNs, YOLO, ByteTrack, NLP

Web & Tools: HTML, CSS, REST APIs, Streamlit, MySQL, Docker, Pandas, NumPy, Git, GitHub, Jupyter Notebook

EDUCATION

RGUKT IIIT, Ongole

2023 – 2027

B.Tech, Computer Science and Engineering – CGPA: 9.2/10

CERTIFICATIONS

Python for Data Science – NPTEL/IIT Madras (Elite)

Cloud Computing – NPTEL IIT Kharagpur (Elite, Top 2%)

OOP with Java & Design Patterns – NPTEL IIT Kharagpur (Elite, Top 5%)

AI Search Methods for Problem Solving – NPTEL IIT Madras (Elite)

Foundations of Deep Learning – NPTEL IISc Bangalore

Data Analysis with Python – IBM

ACHIEVEMENTS & LEADERSHIP

Technical Coordinator, ORNATE 2025 & 2026 Tech Fest, RGUKT Ongole | Campus Mantri, GeeksforGeeks | Volunteer, NSS & Helping Hands Organization
